Art Unit: 1755

The amendment filed on 7 April 2004 amending all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because they are all defined as having a single crystalline structure, which applicants defined in response of 14 August 2003, as meaning single crystals due to the arguments and declaration.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.

Applicants' argument in the response on page 7 is that the phrase "single crystalline" does not mean single crystal as previous argued but as having one crystalline structure, the definition used by the Examiner for the previous art rejections. The fact applicants argued that the polycrystalline films having a single crystalline structure do not have the claimed properties, that the claimed compound cannot be produced by the processes of the references, which are known to produce polycrystalline compounds, and showed this by a declaration clearly indicates applicants considered "single crystalline structure" to mean single crystal. Applicants cannot change their definition of a phrase once they have set it by argument.

The Chemical abstract citation~~f~~ cited as of interest since it teaches doping single crystal ZnO with nickel.
